

Training & Calibration

Pioneer laboratory has been established a calibration section which is approved by the Factory and Ministry of Environment for doing the following services to all kind of Nuclear Gauges.

1. Factory Calibration for all types of Moisture/Density gauges such as Humboldt, CPN, Trolex, Seamen, Instroteck, etc.
2. Leak test for Nuclear Gauges or any sealed sources.
3. Maintenance and repair for all kinds of nuclear gauges by trained technician including selling spare parts and accessories.
4. Selling Humboldt Nuclear Gauge after getting the required approvals from Ministry of Environment.
5. Disposal of the Nuclear Gauges after getting the necessary approvals according to Qatar Law.
6. Personal Monitoring devices and radiation survey meter for gamma & neutron ray.
7. Conducting field density testing using calibration Humboldt moisture density gauges operated by licensed operators approved from Ministry of Environment and properly trained by specialization center.
